Index to Journal of Applied Mechanics

Volume 19, 1952

The JOURNAL OF APPLIED MECHANICS includes papers contributed to the Transactions of the ASME by the Applied Mechanics Division of the ASME.
The JOURNAL OF APPLIED MECHANICS for 1952 was issued quarterly in March, June, September, and December.
(AC) denotes author's closure; (BR) book review; (D) discussion of a paper.

A

ABRAMSON, A. E.
Investigation of annular liquid flow with cocurrent air flow in horizontal tubes... 267

ACOUSTICS
Fundamentals of acoustics (BR)... 247
Introduction to acoustics (BR)... 246
Vibrations of elastic shells in a fluid medium and the associated radiation of sound... 439

AERODYNAMICS
Aerodynamic drag (BR)... 575

AIRPLANE ENGINES
Aircraft jet power plants (BR)... 130

AIRPLANES
Characteristics of fuel motion which affect airplane dynamics... 381
Introduction to the study of aircraft vibration and flutter (BR)... 243

ALUMINUM
Combined tension-torsion tests for aluminum alloy 28-O... 496

ANALOGY. *See* ELECTRIC ANALOGY, MECHANICAL ANALOGY

ANALYSIS. *See* GRAPHICAL METHODS, MATHEMATICS, PIPE AND PIPING, STRUCTURES

ANCKER, C. J., JR.
Stresses in a flat curved bar due to concentrated radial loads... 529

APPLIED MECHANICS
Applied mechanics for engineers (BR)... 245

AUTOMATIC CONTROL
Introduction to the theory of control in mechanical engineering (BR)... 248

B

BARS. *See also* BEAMS, SHAFTS
Photoelastic re-examination of notched tension bars... 124
Simple approximation for the natural frequencies of partly restrained bars... 563
Sinusoidal torsional buckling of bars of angle section under bending loads, as a problem of plate theory (D)... 126
Stress-concentration factors for single notch in flat bar in pure and central bending (Design Data)... 560

BEAMS
Airy integral analysis of beam columns with distributed axial loading having a fixed line of action... 275
Bending of a circular beam resting on an elastic foundation... 1, (D) 570
Bending of orthotropic beams... 227
Bending of rectangular beams... 123
Bending with axial force of curved bars in plasticity... 327
Complementary energy analysis of the failing load of a clamped beam... 563
Deflection and stresses in beams subjected to bending and creep... 478
Forced lateral vibration of beam carrying a concentrated mass... 501
Free vibrations of constrained beams... 471
Large plastic deformation of beams under transverse impact... 308
Limit design of a transversely loaded square grid... 153
Nonlinear problem in the bending vibration of a rotating beam... 461
Plastic-rigid analysis of long beams under transverse impact loading... 465
Theory of plastic bending from a statistical aspect... 347
Torsion of curved beams of rectangular cross section... 49

JOURNAL OF APPLIED MECHANICS

March	1–132
June	133–248
September	249–412
December	413–576

BEARINGS
Calculated performance of dynamically loaded sleeve bearings —III (D)... 239
Electrical method for determining journal-bearing characteristics... 114

BIELITE, F. K.
An alternative formulation of the laws of mechanics (D)... 569

BIJLAARD, P. P.
Sinusoidal torsional buckling of bars of angle section under bending loads, as a problem of plate theory (D)... 126

BLAST. SEE EXPLOSIONS

BLOOMBERG, D. J.
New method of calculation of reheat factors for turbines and compressors (D)... 231

BOND, REUBEN
Chart for oblique shock waves in water (Design Data)... 558

BOOK REVIEWS
Advanced engineering mathematics... 575
Advanced fluid dynamics and fluid machinery... 128
Aerodynamic drag... 575
Aircraft jet power plants... 130
Algebra of vectors and matrices... 244
Analytical mechanics for engineers... 575
Applied mechanics for engineers... 245
Engineering materials... 412
Finite deformation of an elastic solid... 245
Fluid and particle mechanics... 130
Fourier transforms... 247
Fundamentals of acoustics... 247
Grenzschicht-Theorie... 248
Introduction to acoustics... 246
Introduction to the study of aircraft vibration and flutter... 243
Introduction to the theory of control in mechanical engineering... 248
Lectures on classical differential geometry... 244
Linear computations... 246
Mechanics of vibration... 576
Physics of lubrication... 132
Soil testing for engineers... 412
Steam turbines and their cycles... 132
Structure and mechanical properties of metals... 131
Theory of elasticity... 130
Theory of perfectly plastic solids... 131
Thermodynamics of fluid flow... 129
Vibration and shock isolation... 243

BOUNDARY LAYER. *See* FLOW OF FLUIDS

BOURDON GAGE. *See* SHELLS

BROCK, J. E.
Matrix method for flexibility analysis of piping systems... 501
Transverse vibrations of a free circular plate carrying concentrated mass (D)... 127

BUCKLING
Bending and buckling of an elastically restrained circular plate... 167
Computation of flexural-torsional buckling loads (Design Data)... 214
Large deflection theory for orthotropic rectangular plates subjected to edge compression... 446
Optimum problem of the sandwich plate... 104
Sinusoidal torsional buckling of bars of angle section under bending loads, as a problem of plate theory (D)... 126

BURWELL, J. T.
Calculated performance of dynamically loaded sleeve bearings —III (AC)... 242

C

CAMPBELL, A. S.
Time required for constant-volume combustion... 72

CARTER, D. S.
Electrical method for determining journal-bearing characteristics... 114

CARTER, W. J.
Torsion of a circular shaft with diametrically opposite flat sides... 249

CHANG, C. C.
Marcus method applied to solution of uniformly loaded and clamped rectangular plate subjected to forces in its plane... 179

CHAO, B. T.
Theory of plasticity applied to a problem of machining (D)... 234

CHENEA, P. F.
Graphical analysis of axially symmetrical plates with variable thickness... 561

CHRISTIANO, J. G.
Airy integral analysis of beam columns with distributed axial loading having a fixed line of action... 275
Analysis of straight and curved beam-columns (AC)... 411

CLARK, R. A.
Stresses and deformations of toroidal shells of elliptical cross section; with applications to the problems of bending of curved tubes and of the Bourdon gage... 37, 566

COLE, J. D.
Heat conduction in a compressible fluid... 209

COLUMNS. *See also* BEAMS, STRUCTURES
Analysis of elastic two and three-section short columns (Design Data)... 223
Computation of flexural-torsional buckling loads (Design Data)... 214

COMBUSTION
Contribution to the theory of the development and stability of detonation in gases... 63, (D) 409
Time required for constant-volume combustion... 72

COMPRESSION. *See* METAL TESTING—COMPRESSION

COMPRESSORS
Advanced fluid dynamics and fluid machinery (BR)... 128
New method of calculation of reheat factors for turbines and compressors (D)... 231

CONROY, M. F.
Plastic-rigid analysis of long beams under transverse impact loading... 465

CONTACTS
Temperature development in a heated contact with application to sliding contacts... 389

CONVEYERS. *See* MATERIALS HANDLING

CONWAY, H. D.
Bending of a uniformly loaded rectangular plate with two adjacent edges clamped and the others either simply supported or free... 451
Bending of orthotropic beams... 227
Bending of uniformly loaded sectorial plates with clamped edges... 5
Marcus method applied to solution of uniformly loaded and clamped rectangular plate subjected to forces in its plane... 179

CRAEMER, HERMANN
Theory of plastic bending from a statistical aspect ... 347

CREEP OF MATERIALS. *See also* METAL CREEP
Deflection and stresses in beams subjected to bending and creep ... 478

CROSSLEY, F. R. E.
Free oscillation of the centrifugal pendulum with wide angles ... 315

CYLINDERS
On the inextensional theory of deformation of a right circular cylindrical shell(D) ... 231
Partially plastic thick-walled cylinder theory ... 133, (D) 569

D

DEFORMATION
On the inextensional theory of deformation of a right circular cylindrical shell (D) ... 231
Stresses and deformations of toroidal shells of elliptical cross sections; with applications to the problems of bending of curved tubes and of the Bourdon gage ... 37, (D) 565

DESIGN DATA AND METHODS
Analysis of elastic two and three-section short columns ... 223
Calculation of rectangular bar helical springs ... 119
Chart for oblique shock waves in water ... 558
Computation of flexural-torsional buckling loads ... 214
Frequency of vibration of rectangular isotropic plates ... 402
Stress-concentration factors for single notch in flat bar in pure and central bending ... 560
Torsional vibration modes of tapered bars ... 220

DETONATION. *See* COMBUSTION

DIFFUSION. *See* METAL CREEP

DISKS. *See* ROTORS

DONNELL, L. H.
Bending of rectangular beams ... 123

DRIVES. *See* HYDRAULIC DRIVES

DRUCKER, D. C.
Safety factor of an elastic-plastic body in plane strain (AC) ... 233

DU BOIS, G. B.
Calculated performance of dynamically loaded sleeve bearings—III (D) ... 239

DURHAM, F. P.
Supersonic flow with variable specific heat ... 57

DYNAMICS. *See* AERODYNAMICS, AIRPLANES, HYDRODYNAMICS, WAVE MECHANICS

E

EGLI, ADOLF
Steam turbines and their cycles (BR) ... 132

EK, M. C.
Bending of a circular beam resting on an elastic foundation (D) ... 570

ELASTICITY. *See also* STRESSES AND STRAINS
Elastic sphere under concentrated loads ... 413
On the axisymmetric problem of the theory of elasticity for an infinite region containing two spherical cavities ... 19, (D) 410
Theory of elasticity (BR) ... 130
Thermal stresses in bodies exhibiting temperature-dependent elastic properties ... 350

ELECTRIC ANALOGY
Electrical method for determining journal-bearing characteristics ... 114

EXPLOSIONS
Chart for oblique shock waves in water (Design Data) ... 558
Progressing-wave approach to the theory of blast shock ... 257

F

FADUM, RALPH E.
Soil testing for engineers (BR) ... 412

FATIGUE. *See* METAL FATIGUE

FEIGEN, MORRIS
Minimum weight of tapered round thin-walled columns ... 375

FETTIS, H. E.
Torsional vibration modes of tapered bars (Design Data) ... 220

FLETCHER, H. J.
Thin rectangular plates on elastic foundation ... 361

FLOW OF FLUIDS. *See also* SUPERSONIC FLOW
Fluid and particle mechanics (BR) ... 130
Grenzschicht-Theorie (BR) ... 248
Heat conduction in a compressible fluid ... 209
Investigation of annular liquid flow with cocurrent air flow in horizontal tubes ... 267
On the extrusion of a very viscous liquid (D) ... 230
Pressure drops in the pneumatic conveyance of solids ... 425
Progressing-wave approach to the theory of blast shock ... 257
Thermodynamics of fluid flow (BR) ... 129
Torsion of uniform rods with particular reference to rods of triangular cross section ... 554

FLUGGE, W.
Optimum problem of the sandwich plate ... 104

FLUID DYNAMICS. *See* HYDRODYNAMICS, WAVE MECHANICS

FLUID FRICTION. *See* FRICTION, SUPERSONIC FLOW

FLUID MECHANICS. *See* FLOW OF FLUIDS

FLUTTER. *See* AIRPLANES, VIBRATION

FORSTALL, WALTON, JR.
Thermodynamics of fluid flow (BR) ... 129

FORSYTHE, GEORGE E.
Linear computations (BR) ... 246

FRICTION
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. 1—Apparatus, data, and results based on a simple one-dimensional flow model ... 77
2—Results based on a two-dimensional flow model for entrance region ... 185
Temperature development in a heated contact with application to sliding contacts ... 369

FROCHT, M. M.
Photoelastic re-examination of notched tension bars ... 124
Stress-concentration factors for single notch in flat bar in pure and central bending (Design Data) ... 560

G

GAGES. *See* INSTRUMENTS—PRESSURE

GALLAGHER, JOSEPH
Mathematical analysis of the relaxation type of vehicle suspension ... 389

GARDNER, K. A.
Heat-exchanger tube-sheet design—2. Fixed tube sheets ... 159, 573

GAS—SOLID MIXTURES. *See* FLOW OF FLUIDS

GASES
Contribution to the theory of the development and stability of detonation in gases ... 63, (D) 409
Supersonic flow with variable special heat ... 57, (D) 405
Time required for constant-volume combustion ... 72

GERARD, GEORGE
Linear bending theory of isotropic sandwich plates by an order-of-magnitude analysis ... 13. 405

GILROY, T. I.
Stresses and deformations of toroidal shells of elliptical cross section; with applications to the problems of bending of curved tubes and of the Bourdon gage ... 37. 566

GOLDSMITH, WERNER
Chart for oblique shock waves in water (Design Data) ... 558

GONGWER, C. A.
Study of vanes singing in water ... 432

GRAHAM, E. W.
Characteristics of fuel motion which affect airplane dynamics ... 381

GRAPHICAL METHODS
Calculation of rectangular bar helical springs (Design Data) ... 119

GRAPHICAL METHODS (continued)
Chart for oblique shock waves in water (Design Data) ...
Graphical analysis of axially symmetrical plates with variable thickness ... 561
On a general method of solving second-order ordinary differential equations by phase-plane displacements ... 543
Stress-concentration factors for single notch in flat bar in pure and central bending (Design Data) ... 560

GRAVITATION. *See* STRESSES AND STRAINS

GRAY, C. A. M.
Analysis of fully restrained slabs under concentrated loads ... 422

GREEN, LEON, JR.
Correlation of creep properties by a diffusion analogy ... 320
Gas cooling of a porous heat source ... 173

GREENBERG, H. J.
Safety factor of an elastic-plastic body in plane strain (AC) ... 233

GRIDS. *See* BEAMS, STRUCTURES

GROSSMAN, NICHOLAS
Analytical mechanics for engineers (BR) ... 575
Engineering materials (BR) ... 412

GUERNSEY, R., JR.
Photoelastic re-examination of notched tension bars ... 124

H

HAHN, R. S.
Theory of plasticity applied to a problem of machining (D) ... 235

HAUSRATH, A. H.
Large deflections of circular plates ... 287

HEARMON, R. F. S.
Frequency of vibration of rectangular isotropic plates (Design Data) ... 402

HEAT EXCHANGERS
Heat-exchanger tube-sheet design—2. Fixed tube sheets ... 159, (D) 572

HEAT TRANSFER
Gas cooling of a porous heat source ... 173, (D) 566
Heat conduction in a compressible fluid ... 209
Temperature development in a heated contact with application to sliding contacts ... 369

HENRIKSEN, E. K.
Theory of plasticity applied to a problem of machining (D) ... 237

HERMES, R. M.
On the inextensional theory of deformation of a right circular cylindrical shell (AC) ... 231

HERRMANN, G.
Sinusoidal torsional buckling of bars of angle section under bending loads, as a problem of plate theory (D) ... 126

HEYMAN, JACQUES
Limit design of a transversely loaded square grid ... 153

HILTON, H. H.
Thermal stresses in bodies exhibiting temperature-dependent elastic properties ... 350

HIRSCH, R. A.
Effect of a rigid circular inclusion on the bending of a thick elastic plate ... 28

HODGE, P. G., JR.
Limit design of a full reinforcement for a circular cutout in a uniform slab ... 397

HOFF, N. J.
Complementary energy analysis of the failing load of a clamped beam ... 563
On the inextensional theory of deformation of a right circular cylindrical shell (D) ... 231

HOLL, D. L.
Theory of elasticity (BR) ... 130

HOLM, RAGNAR
Temperature development in a heated contact with application to sliding contacts ... 369

HONEYCOMBS. *See* PLATES

HOPPMANN, W. H., 2ND
Forced lateral vibration of beam carrying a concentrated mass ... 301

HORVAY, G.
Bending of honeycombs and of perforated plates ... 122, 406
Heat-exchanger tube-sheet design—2. Fixed tube-sheets (D) ... 572
Mechanics of vibration (BR) ... 576
Plane-stress problem of perforated plates ... 355
Stresses in pipe bundles (AC) ... 229
Vibration and shock isolation (BR) ... 243

HOUSNER, G. W.
Bending vibrations of a pipe line containing flowing fluid ... 205

HRONES, JOHN A.
Introduction to the theory of control in mechanical engineering (BR) ... 248

HU, L. W.
Determination of theoretical plastic stress-strain relations for variable combined stress ratios ... 485

HUANG, M. K.
Bending of a uniformly loaded rectangular plate with two adjacent edges clamped and the others either simply supported or free ... 451
Bending of uniformly loaded sectorial plates with clamped edges ... 5

HYDRAULIC DRIVES

JACOBSEN, L. S.
On a general method of solving second-order ordinary differential equations by phase-plane displacements ... 543

JET PROPULSION
Aircraft jet power plants (BR) ... 130

JUNGER, MIGUEL C.
Vibrations of elastic shells in a fluid medium and the associated radiation of sound ... 439

K

KAYE, JOSEPH
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube.
1—Apparatus, data, and results based on a simple one-dimensional flow model ... 77
2—Results based on a two-dimensional flow model for entrance region ... 185
New method of calculation of reheat factors for turbines and compressors (AC) ... 232

KEENAN, J. H.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. 1—Apparatus, data, and results based on a simple one-dimensional flow model ... 77

KETCHUM, G. M.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. 1—Apparatus, data, and results based on a simple one-dimensional flow model ... 77

KLINGENSMITH, K. K.
Measurement of recovery factors and friction coefficients for supersonic flow of air in a tube. 1—Apparatus, data, and results based on a simple one-dimensional flow model ... 77

KLOTTER, KARL
On elastic continua with hereditary characteristics (D) ... 127

KORST, H. H.
Supersonic flow with variable specific heat (D) ... 405

L

LANDSBERG, D.
Photoelastic re-examination of notched tension bars ... 124

LANE, FRANK
Optimum single propellers in radially varying, incompressible inflow ... 252

LANGHAAR, H. L.
Fluid and particle mechanics (BR) ... 130
Lectures on classical differential geometry (BR) ... 244
Note on energy of bending of plates ... 228
Torsion of curved beams of rectangular cross section ... 49

LEE, E. H.
Large plastic deformation of beams under transverse impact ... 308
Linear bending theory of isotropic sandwich plates by an order-of-magnitude analysis (D) ... 405
Plastic flow in a V-notched bar pulled in tension ... 331
Plastic-wave propagation effects in high-speed testing (AC) ... 230
Stresses in pipe bundles (D) ... 229
Theoretical analysis of metal-forming problems in plane strain ... 97
Theory of plasticity applied to a problem of machining (AC) ... 238

LEE, F. Z.
Analysis of two and three-section short columns (Design Data) ... 223
Free vibrations of constrained beams ... 471

LEE, TI-CHIANG
On the stresses in a rotating disk of variable thickness ... 263

LEVEN, M. M.
Stress-concentration factors for single notch in flat bar in pure and central bending (Design Data) ... 560

LEVY, SAMUEL
Fundamentals of acoustics (BR) ... 247
Introduction to acoustics (BR) ... 246

LIBBY, PAUL A.
Aerodynamic drag (BR) ... 575
Introduction to the study of aircraft vibration and flutter (BR) ... 243

LING, CHIH-BING
On the stresses in a notched strip ... 141

LO, HSU
Nonlinear problem in the bending vibration of a rotating beam ... 461

LUBRICATION
Calculated performance of dynamically loaded sleeve bearings—III (D) ... 239
Physics of lubrication (BR) ... 132

LUND, P. G.
On the extrusion of a very viscous liquid (D) ... 230

LURIE, HAROLD
Lateral vibrations as related to structural stability ... 195, 572

M

MACGREGOR, C. W.
Finite deformation of an elastic solid (BR) 245
Theory of perfectly plastic solids (BR) ... 131

MACHINING. *See* METAL CUTTING

MALKIN, I.
Bending of honeycombs and of perforated plates (D) ... 405

MARIN, JOSEPH
Deflection and stresses in beams subjected to bending and creep ... 478
Determination of theoretical plastic stress-strain relations for variable combined stress ratios ... 485

MATERIALS HANDLING
Pressure drops in the pneumatic conveyance of solids ... 425

MATERIALS TESTING
Engineering materials (BR) ... 412
Plastic-wave propagation effects in high-speed testing (D) ... 230

MATHEMATICS. *See also* STATISTICAL METHODS
Advanced engineering mathematics (BR) ... 575
Airy integral analysis of beam columns with distributed axial loading having a fixed line of action ... 275
Algebra of vectors and matrices (BR) ... 244
Analysis of fully restrained slabs under concentrated loads ... 422

MATHEMATICS (*continued*)
Bending of a uniformly loaded rectangular plate with two adjacent edges clamped and the others either simply supported or free ... 451
Bending of elastoplastic circular plates with large deflection ... 293
Computation of flexural-torsional buckling loads (Design Data) ... 214
Finite deformation of an elastic solid (BR) 245
Fourier transforms (BR) ... 247
Frequency of vibration of rectangular isotropic plates (Design Data) ... 402
Gravitation stresses on deep tunnels ... 537
